

ANNOUNCING “SPECIALTY AVIATION”

Texas United is pleased to announce the addition of a new line of business. We are now offering “Specialty Aviation” in our rapidly growing portfolio.

The policies issuable will provide coverage of aviation products including antique and classic aircraft, experimental and homebuilt aircraft, “warbirds” and ex-military aircraft and seaplanes. Insurance for transitioning pilots is also available.

Initially, only aircraft based in the Continental United States will qualify for coverage with geographic limits extending to Canada, Mexico, the Bahamas and the Islands of the Caribbean, as necessary. We are able to offer hull limits up to \$500,000 per aircraft and up to \$1,000,000 liability coverage. (Higher limits on specific aircraft will become available soon). “Liability only” policies, including medical payments coverage, are also available. The total maximum number of seats will be ten per aircraft, and policies will be offered on 12-month terms with shorter terms available for special events.

We hope that you find this new line of business helpful in meeting your clients’ needs as we continue to offer you with vast options.
